

## **Expectation**

First of all, thank you to help to mark the content in these URLs, based on your expertise. The total score range is 0-9. Then, I hope everyone can suggest and give the best URL for each question. And you can give a general evaluation or feedback of all the URLs in each question.

The scoring criteria can be based on:

- Whether the content (in each URL) answers questions and level of detail
- Content (in each URL) integrity
- Whether the content (in each URL) has related extensions
- Whether the content (in each URL) is cutting-edge or relatively new
- Whether the content (in each URL) is easy to understand
- Author's popularity
- Published time of the content

These are just references and you can be based on other aspects.

Finally, thank you for taking the free time to drive the entire project.
